

Drug Formulary

What it Tells You...
...and What it Doesn't

What your drug formulary WILL tell you

Each medicine considered to be **covered**

“Tier” that it is placed on

Indicators for use (called utilization management):

- Prior Review/Prior Authorization (PA)
- Quantity Limitations (QL)
- Restricted Access or Step Therapy (ST)
- Specialty Drugs
- Specific dosage, forms, and/or strength limitations

A “legend” to **identify** specific abbreviations and markers

Assume delivery via an **in-network pharmacy provider** within your plan, whether retail/local, mail-order, or specialty pharmacy

Information may actually be contained on **numerous ‘lists’**

Medications considered to be preventative when prescribed in connection with preventative benefits - **no cost**

Actual cost of that medication when **filled at a pharmacy**

Your exact **out-of-pocket responsibility** related to that tier of drugs

Information on your **pharmacy deductible**

Brand-name alternative or **generic** alternatives

Cost variance of mail order vs. retail pharmacy

Alternatives to your medication

List of medicines **outside** of the formulary and **not covered**

Anything related to **over-the-counter** medications

Medications connected to **plan exclusions** (cosmetic use, sexual issues, weight loss)
